

HP Indigo Print Beat

For HP Indigo Sheet-Fed Digital Presses

Benchmark press performance to drive continuous improvement

The HP Indigo Print Beat report is a performance dashboard, emailed to HP Indigo customers weekly to provide them with greater visibility and insight into their press' performance. The Print Beat report enables easy access to key performance information, which has been recognised as instrumental in driving continuous improvements in uptime and productivity for operational excellence.

The HP Indigo Print Beat is part of HP Service Advantage – an integrated portfolio of services for HP customers that enables predictable printing operations and optimised cost structure.

Simple, straight forward performance tracking

Overall performance is aggregated to a single 0-100 Print Beat score, so it is easy to understand your overall production performance and where opportunities for improvement exist.

Multiple performance indicators

Excellence in production comes from multiple areas. The Print Beat report tracks performance across five key parameters: print volume, failure rates, jam rates, restart rates, and supplies lifespan. These indicators not only show you how well your production did, but also on which areas to focus.

Drives continuous improvement

Improvement can easily be tracked by looking at the arrow signs. Up means better than the previous week, down is worse, and the equal sign means you are on par versus your prior week's performance.

Sent to your inbox every week

The Print Beat report is automatically sent every week, giving you easy access for production visibility and insight.

Full transparency and shared goals

Your assigned primary HP engineer and the service team are receiving the same report on a weekly basis, for full transparency and goal sharing.
